DETAILED ACTION

Allowable Subject Matter

Claims 1 – 19 are allowed.

The following is an examiner's statement of reasons for allowance:

Shumovich shows a well-known stripline coupler comprising short-circuit stubs on a single layer. Hallford shows a similar coupler device as Shumovich with open circuited stubs (46) where the coupler and stub are also located on the same layer. Stover shows a multi-layered transformer comprising dual primary and secondary windings on both layers, further including a short-circuit stub (104) on the second layer but not including an upper cover layer which includes the two coupled lines. In the alternative, the short-circuited stub would not be positioned between at least one coupled line and the first conductive layer (claim 1), nor would it have been obvious to combine the prior art, thus the claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shumovich – shows a stripline coupler.

Hallford – shows a microwave frequency converter.

Stover – shows a microwave transformer.
